### ***Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 75 has been renumbered 76. It is noted that applicant's response indicates that the newly added claims is numbered 76. However, the copy of the claims shows claims 61-75 canceled then newly added claim 75. Again, this claim has been renumbered as claim 76, and applicant should indicate such a change in future responses.

Additionally, claim 76 recites "An apparatus as in claim 18", and should read "A method as in claim 18".

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 3739

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 18-23, 54-60 and 76 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,939,348. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method steps recited in the patented claims and the instant application claims recite only minor, obvious differences.

Claims 18-23, 54-60 and 76 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the pending claims of copending Application Nos. 10/787,532; 10/811,228; 10/873,348; and 11/053,274. Although the conflicting claims are not identical, they are not patentably distinct from each other because there are only minor, obvious differences between the instant application claims and the method claims of the other pending applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

Applicant's arguments regarding the 35 USC 103 rejections and the prior art are deemed persuasive. In particular, the examiner's Interview Summary of May 11, 2006 addresses the prior art issues and why the claims distinguish over the prior art of record.

Applicant has failed to provide a terminal disclaimer to obviate the double patenting rejections, and has also failed to provide arguments against the double patenting rejections. As such, these rejections are maintained and made final.
